Joe Edley : 10-Minute Bananagrams! before purchasing it in order to gage whether or not it would be worth my time, and all praised 10-Minute Bananagrams!:

I purchased 10-Minute Bananagrams because it looked like something I would like. I was right - I really enjoyed this puzzle book. It contains over 500 fairly short puzzles with two difficulty levels. Each puzzle should take ten minutes or less to solve. I found that this was pretty accurate. There were some that I solved in less than ten minutes and a few that took me longer than ten minutes. There are ten different puzzle types, and some of them I liked far more than others. A lot of them are anagram types of puzzles, which is a type of puzzle I really like. I found these puzzles to be just right for solving

during my lunch hour or while watching TV and it took me about a year to complete the whole book. This book would be good for teens and adults of all ages - pretty much anyone looking for puzzles that are fairly short. 0 of 0 people found the following review helpful. Good for Gray Matter By Musette Love these books because they have a variety of puzzles that can keep your mind occupied while waiting for appts. It's amazing how some are quick solves and others make you think longer than "10 minutes". I usually include one in my "Get Well" Care Packages for friends. 2 of 2 people found the following review helpful. fun for everyone! By customer # 8 This book is so versatile- you try each challenge alone or with friends to help. It is a fun short break or an all night event. There are activities that an average player can enjoy and more challenging ones for the more hard core or expert word game enthusiast. It is also great for the car or airplane. Well worth it!
