Who Knew?By Karl MinnerTyler Backhause's 101 Creepy, Weird, Scary, Interesting, and Outright Cool Facts: A Collection of 101 Facts that are Sure to Leave You Creeped Out and Entertained at the Same Time is well-written and assembled collection of knowledge that will leave you bewildered, entertained and yes-- informed.The author has gone through great lengths to put this collection together. You'll learn such things like the 1982 movie Tron didn't win the Oscar for best special effects because they were mostly produced with the computer and the powers that be in Hollywood deemed this to be cheating; you'll learn that crocodiles with all of their teeth don't chew their food, but instead swallow it whole; and you'll learn that Nazi Germany had one of the earliest and most robust anti-smoking campaigns around which pre-dated the start of World War II and much more.Pick up a copy and enjoy it at your leisure. It is guaranteed to make you an ace at Trivial Pursuit and to lend itself to some interesting conversation perhaps around the dinner table or at your next get together.Highly recommended and fun!0 of 0 people found the following review helpful. Great bookBy (HASSAN)This kind of e-book should indeed be a very great e-book. The idea has always been ma's hunger pertaining to knowledge which will keep your ex on obtaining interested ad let your ex investigate more the entire world. When i relished scanning this e-book. The facts listed here would certainly big surprise people as well as cause you to more proficient. It is wonderful to recognise more concerning the earth. It is wonderful to recognise brand new items. This kind of e-book would certainly certainly cause you to experience more cleverer right after reading. You can be consequently thrilled to talk about your new breakthroughs.0 of 0 people found the following review helpful. Amazing list of facts I have never heard before!By C. BrantThis book is packed with interesting and unique facts that will impress your friends. I had heard of a few of them before, but for the most part, this book was packed with facts that are truly amazing. They cover a wide variety of areas like plants and animals, history, science, and popular culture. They are extremely useful to pull out at parties. Who has ever heard of most of this stuff before? I know my friends are amazed at the trivia I give them from this book. It isn't something you will want to pass up!

Who doesnt love facts and random bits of information? I did not know that or Teach me something I don't know! are a commonly heard phrases among people today. Along with this, the most powerful driving force behind our random browsing of the Internet or Social Media is the pursuit of new information. This brings me to the reason why I wrote 101 Creepy, Weird, Scary, Interesting, and Outright Cool Facts. Here are some categories you will receive facts from in this book: Plants and Nature Computers and Technology History Science, math and space Urban legends Did you know that sea cucumbers are a class of invertebrate marine animals which inhabit almost every sea in the world? Their bodies can regenerate at an exceptionally fast rate, which allows them to regrow organs that were completely lost. As such, they have developed a defensive mechanism where they throw out their intestines and sometimes even more internal organs when they are attacked by predators. This is just one of the facts listed in this book so if youre ready for me, start reading now. In addition to 101 Creepy, Weird, Scary, Interesting, and Outright Cool Facts, you will receive 5 books included for free as a sign of my appreciation.
