Jerry Storms : 101 Music Games for Children: Fun and Learning with Rhythm and Song (SmartFun Activity Books) before purchasing it in order to gage whether or not it would be worth my time, and all praised 101 Music Games for Children: Fun and Learning with Rhythm and Song (SmartFun Activity Books):

3 of 3 people found the following review helpful. Great Music Instruction book for elementary ed. By 59 Fender Bassman I have always had a hard time finding good substitutes to fill in for me when I take a day off. I bought this book to leave with substitutes that have no musical background and for that purpose it has worked perfectly. The games are described in a very straight forward and comprehend-able fashion; no useless jargon that would go over any one's head. I have also found that many of the games in this book are perfectly suited to teach regular music classroom curriculum. The exercises in it are great and the children love learning new concepts or even reviewing old ones using the games in this book. I highly recommend this book to not just music teachers but to any teacher period.

Just didn't meet my needs By reelwhiz I'm sure that this is a great resource for some, but for me, this did not help with the goal of trying to adapt lessons in a church setting for a weekly 15 minute game session. I actually only found two games out of the 101 that I could effectively adapt for the goals of three rotating sessions (games, instruments, and singing) for children music ministry ages four through fourth grades.

4 of 4 people found the following review helpful. Cute music games By JustReading2008 I am a music educator, and bought this book as a gift for a friend who is still in college to get her music ed degree. The games are cute and fun, but it would not be wise to use them for entire lessons, as not all of them are very musical. But, they are a lot of fun and a great way to reward students for a good day in class or just to get them excited about music. My favorite thing about this book is that it tells you how long each activity will take so that you can plan appropriately.

This lively and imaginative book is being used in homes and schools in over 13 countries to help children learn about music and sound while they develop the ability to listen, concentrate, be creative, improvise, and trust one another. Using audiocassettes or CDs, of popular songs and simple instruments children and adults get to play listening games, concentration games, musical quizzes, trust games, guessing games, and more. The games are not competitive they encourage and reward children for participation, not for winning. The SmartFunActivity series encourage imagination, social interaction, and self-expression in children. To make the books easy to use, games are marked according to appropriate age levels, length of play time, and group size, using helpful icons. Most games are non-competitive and none require special skills or training. The series is widely used in homes, schools, daycare centers, clubs, and summer camps.
