About the Author D.E. Wrightson is a professional Trumpeter, composer educator in music. As a professional trumpeter, I have found a need for popular wedding music arranged in the original key of the origin work, thus enabling the accompanying organist to be already familiar with the fingering. This end necessitates the use of the High D Trumpet, for the sake of convenience, playability, tone range. This collection comes from my personal accumulation of arrangements over years of engagements (pardon the pun) with my D Trumpet for weddings where there was little preparation time with the organist.
