If you want hard puzzles that make you think and look everything over twice, the Absolutely Nasty Sudoku book series is for you. Each book is harder than the last, making the fourth book an ultimate test of your Sudoku abilities and your patience. This series is for those who know hard to work Sudoku puzzles and can finish a newspaper puzzle in under five minutes.I am now

solving these puzzles for a third time and have yet to solve each puzzle. This is a series you can count on to make a prime solving event each time you open the book, and every time to try the book. If you can get every puzzle in one of these books then you are a true Sudoku master. 1 of 1 people found the following review helpful. You will want to burn this book. By Stella Hardest puzzles I have ever solved. I'm only 11 in so far and it's taken me forever. Some puzzles seem insolvable while others only take a couple hours. This is not for the novice. You will get frustrated. You will yell. You will erase all numbers over, and over and over again... Just when you think you've beat it and you can sigh a breathe of relief you will realize that once again; your numbers are wrong somehow. You will want to burn this book. However if you're looking for puzzles and find the ones in the paper and magazines too easy then this is the book for you. While I want to give it 1 star because I'm having difficulty I have to give it 5 because it really is absolutely nasty sudoku. I just wish there was a "sort of rude" to preference this first. I had no idea of what I was getting myself into. 0 of 0 people found the following review helpful. Very Difficult. By Lynn This is serious Sudoku; not for the fair weather fan.

The vast majority of sudoku puzzles that are labeled "hard," "expert," "challenger," are not really all that difficult. And in a surprising number of cases, they are downright easy. In the "Absolutely Nasty Sudoku" books, you will find puzzles truly worthy of the label "hard." The puzzles increase in difficulty throughout the four books in the series. It ranges from basic and intermediate puzzles and techniques at Level No. 1, to the most advanced techniques at Level No. 4, along with puzzles that require multiple advanced techniques each time.
