Frank Longo : Absolutely Nasty Sudoku Level 3 before purchasing it in order to gauge whether or not it would be worth my time, and all praised Absolutely Nasty Sudoku Level 3:

0 of 0 people found the following review helpful. a lot of fun for those looking for hard-to-work Sudoku puzzles this series ...By Sue Morris @ Kid Lit Reviews Difficult, challenging, hard to complete, a lot of fun for those looking for hard-to-work Sudoku puzzles this series is the ONLY book to have truly hard puzzles. If you want hard puzzles that make you think and look everything over twice, the Absolutely Nasty Sudoku book series is for you. Each book is harder than the last, making the fourth book an ultimate test of your Sudoku abilities and your patience. This series is for those who know hard to work Sudoku puzzles and can finish a newspaper puzzle in under five minutes. I am now solving these puzzles for a third time and have yet to solve each puzzle. This is a series you can count on to make a

prime solving event each time you open the book, and every time to try the book. If you can get every puzzle in one of these books then you are a true Sudoku master. 1 of 1 people found the following review helpful. so if that is what you want then this is a good buy. But if you simply want hard puzzles By Dont Need Cable It has very hard puzzles, so if that is what you want then this is a good buy. But if you simply want hard puzzles, then pick another book. 1 of 1 people found the following review helpful. OMG By Moni I almost didn't want to give it 5 stars - it's really really difficult! I thought I was a Sudoku expert, completing the 'four star' drugstore puzzles in minutes. Honestly, I've had this book for a long period of time, and it will probably take me another year or so to complete it. It's well worth the money if you want a true Sudoku challenge. It will make you want to pull your hair out at times. I love it!

The difficulty level soars, as even more tricks get added to the mix: X-Wing; Swordfish; XY-Wing; XYZ-Wing; and the Gordonian Rectangle.
