Gave me headachesBy MarleeI was curious as to what made this word search book "absolutely nasty" and was intrigued by the fact it said letters would change, etc. so I bought it. Let me tell you - my head hurts every time I attempt one of these puzzles. The font is so that several letters look the same and they also face different directions. I'm sure for some people that this is a great challenge but for me it is not

enjoyable. I bought the first book and found it to be much better.0 of 0 people found the following review helpful.

Working on this book has become something my best friend and I love to do togetherBy Sarah BarrWorking on this book has become something my best friend and I love to do together. We get frustrated at how the letters turn and words look like nonsense from every direction. It's fantastic. It was not until the third time we worked together that we actually read the front and found out there was a quote in every puzzle as well! We are quite impressed.

Welcome to the toughest word searches ever created, where letters change depending on which direction you look at them! These puzzles will leave you dizzy from the devilish twists and turns required to complete them.
