Check your book when you receive it to ensure yours doesn't have the same error. 0 of 0 people found the following review helpful. Not just for adults!!! By Customer. My son is advancing on piano. His teacher suggested switching to Faber adult piano course books. These books were well worth the money. I'm glad we switched to Faber. 0 of 0 people found the following review helpful.

FantasticBy Ruth A. ReeceI am using this series of books to learn to play the piano. It is designed for the older adult. It is the best series I have found. My piano teacher uses it. It is very easy to follow and repeats itself to facilitate learning. I love this series. Would recommend it to anyone older who wants to learn to play the piano.

(Faber Piano Adventures). Accelerated Theory Book 2 is divided into fifteen units, correlating with the fifteen units of Lesson Book 2. Each unit provides valuable reinforcement of basic theory concepts through writing, sightreading, and ear-training activities.
