NOT JUST FOR KIDS By Critical Mass For ages 7 and up this is a fine book for those who are into a host of challenging puzzles involving numbers, word games, etc. The Mazes are especially fun to work with. These kinds of books are particularly worthwhile for youngsters since they stimulate the brain in so many different ways. In this day and age, thanks to texting and other activity, the ability to add simple arithmetic, see things in a spatial way, and build a decent working vocabulary are becoming things of the past. A book such as this will help to put any individual on a more correct path when it comes to the enumerated categories above. As a matter of fact, even adults would benefit from books of this type. 1 of 1 people found the following review helpful. Buy it By K. Blevins Kept those little turds busy the whole road trip. More than worth the money. Tip: give

your kid a cookie sheet to put on their lap. Easier to write in the book when it's flat and level. The easier it is the more they'll use it. 0 of 0 people found the following review helpful. but they were fun and colorful

The puzzle were not very challenging to my child, but they were fun and colorful. There also were too few puzzles relative to the price. I would not purchase it again.

Kids need to constantly be learning new skills and honing the ones they have just started to develop. One top way that an activity book that stresses intellectual abilities through mazes, word games, puzzles and other activities is highly beneficial as it helps kids strength those skills rooted in logic while being fun for kids at the same time so that they never get bored and turn to those activity books time and time again. Kids enjoy learning through fun activities and thus such activity books are the ideal option.
