Anthony McCarten : The Theory of Everything: The Screenplay before purchasing it in order to gage whether or not it would be worth my time, and all praised The Theory of Everything: The Screenplay:

Based on Jane Hawkings best-selling memoir Travelling to Infinity: My Life with Stephen, Anthony McCartens screen adaptation for the hit movie The Theory of of Everything, starring Eddie Redmayne and Felicity Jones, is one

of the most talked about and award-worthy scripts of the film season. In the film, we follow Jane and Stephen Hawking from their first meeting to the first signs of Stephens illness and their wedding, through to the challenges of having to deal with disability and unexpected success and the strain this puts on the loving couples relationship. The result is a feat of cinematic brilliance and screenwriting bravura from the author of several acclaimed novels.
