Hey Buddy, Can You Spare an Extra \$20,000?By 4321dudShe was a classy call girl with a heart of gold, a head for numbers, and a yearning for good old fashioned love. And none of that changed when she lost her dice virginity at a Las Vegas craps table. Now Tina loves a good roll at the dice table just as much as a good roll somewhere else with one of her clients. But will Tina ever find true love, or a true craps system?

Here's some advice, of sorts, from page 53, "I just can't understand why they all didn't switch to the don't side with me. If a table is hot, pass line bets are great, but when a table is cold, why not bet the don't side?" Eventually, Tina studies accounting and computers (circa 1994). She and some fellow "Ladies" go into a legitimate business together. As for her craps playing, she met a guy. Together they try out various systems. For the most part, Tina's systems are for entertainment purposes. You'll win a few sessions; you'll lose a few sessions. Don't quit your day job. And DON'T let the kids near this book! 2 of 2 people found the following review helpful. WHAT A FUN WAY TO LEARN ABOUT CRAPS! By Philip G. Chapman If dry as dust, lists of statistics craps tutorials make you glaze over try this. The "insider" view of the call girl scene, the casino scene, and the craps scene in Las Vegas gives this book an authentic feel. You think you are reading a fun sexy story about the adventures of a call girl and all of a sudden you realize that you now know how to play craps and play it well! What a great book! An original and brilliant combination punch! Highly recommended. 1 of 2 people found the following review helpful. A fun read By Ronald J. Legere The book was an enjoyable read. Its not literature. Its a goofy story about a hooker learning craps, and if you read it you will smile and learn a few things along with her. Many of the things are irrational (based on the gambler's fallacy), so you might want to read something serious [...] about craps before you take anything you learn here to the tables!

In this terrific novel, Tina starts out with the basics - pass/come bets - and proceeds to advanced hedges and proposition betting schemes. Interwoven with the craps theory is the story of a lost love, a new Las Vegas night club and a mysterious man inappropriately named "Big Red". You'll laugh, be entertained and learn, as Tina did, how to become an advanced craps player and win consistently. (Contains Sexual Situations)
