Charles Ashbacher, Jennifer Corrigan : Topics in Recreational Mathematics 5/2015 (Volume 5) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Topics in Recreational Mathematics 5/2015 (Volume 5):

0 of 0 people found the following review helpful. Five Stars By Customer Excellent.

This book is the fifth in our series of books in recreational mathematics. It is designed to be a continuation of the work of our predecessors Martin Gardner and Joseph S. Madachy. There is a complete index to Recreational Mathematics Magazine that was published in the early 1960s by Joe Madachy. A problem column is included as well as research papers and the editors encourage people to contribute items for future issues.

About the Author Charlie Ashbacher was the manuscript content editor for Journal of Recreational Mathematics for the

last eight years that it was published. He was active in recreational mathematics for years before that and retains his love for the lighter and more playful side of mathematics. This book is the latest iteration in his goal to provide an outlet for people that enjoy doing mathematics for fun. Charlie has been teaching college mathematics and computer science for decades and when he was full-time he taught every course in the mathematics and computer science curriculum. He is also a highly ranked reviewer on and along with his daughter does yard work for the elderly.
