**Djape : Tridoku Book: Large Font - 100 puzzles** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Tridoku Book: Large Font - 100 puzzles:

1 of 1 people found the following review helpful. Best book of my favorite puzzles!By Debbie VTridoku puzzles are my favorite, and Djape didn't disappoint with this book. I love the large print. That made it so much easier to work. I had a hard time putting this book down. I can't wait for his next book of Tridoku puzzles!0 of 0 people found the following review helpful. A little disappointed!By Zeinab HassounaI like the large print ,and the fact that each page has only one puzzle . BUT the puzzles are not very challenging. Too easy ! Each puzzle starts off with too many numbers.

Welcome to TRIDOKU! Is this Sudoku? Well... YES! ...and NO! TriDoku puzzles have the same number of cells as Sudoku: 81. However, there are no rows or columns! Instead, there are triangles. In fact, the whole grid has gone triangular. The nonets are there, but instead of being 3x3 squares, they've become triangles, too. Oh, and did you know that in Tridoku puzzles there are also lots of hexagons? However, despite all those differences, the basic principle of Sudoku still applies: you cannot repeat a number in any of the defined regions. It's a lot of fun and a chance to develop new problem solving skills! All puzzles are NEW, previously unpublished and they are printed in LARGE FONT. ENJOY!
