One will not get rich, but one will look at harness racing with so hope they will be able to pick out winners. Tie this book with the Equibase Apps and picking horses can be fun. 2 of 3 people found the following review helpful. The Handicapping Book for Today's Standardbred Races. By Starman Finally an up to date usable procedure for successfully handicapping today's harness races. This book is the best I've read because it didn't leave me saying " Ok, all this info is very informative, now what?" Bob explains very clearly just how to put the information together and apply it. IMO all other books on harness racing have become outdated. The game has changed. Fundamentals can be found in the better older works, but, not the what to do part. New concepts like ZIP, are extremely helpful in the analysis of a race. Buy this book you won't be sorry you did. Pandycapping is the NOW way to handicapping successfully. This is true of his thoroughbred techniques also. There is a new book on on Pace Handicapping also by Pandolfo can't wait to get it. I'm a young senior citizen and have been in the game for years. I can assure you Robert Pandolfo is at the top of his/our game. The Diamond System software he puts out is also tops. This is a thinking man in a thinking man's game. Not since the great work of Dr. Howard Sartin and the PIRCO boys have I seen anything as good, until what Pandolfo is putting forth. Looking into all he

Bob "Pandy" Pandolfo's new harness handicapping book is 126 pages long. This paperback book can be used by novice or experienced harness handicappers and has step-by-step easy to use handicapping methods. One thing that has always bothered me about handicapping books, they often give you information but don't really tell you how to put it into action. Consequently, you end up with a lot of info but poor results. This book isn't like that. I give you a lot of information, but I always show you EXACTLY how to use the information in an easy, step-by-step approach that works.
