Using archival images from the manufacture the author presents a complete history of the aircraft and its operational record. And its affordable !!!

This book gives the full story of how the Soviet Union's most potent strategic bomber, the Tupolev Tu-160 (know to the Western world as the Blackjack) was designed, built and put into operational service. The author reveals many

unknown aspects of the Tu-160 story, including the development tender in which many of the Soviet Union's top-class aircraft design companies participated. Bolstering its strategic potential in order to offset the reduction in ballistic missiles, Russia is now resuming production of the Tu-160.
