For more than 25 years, the writers at the Bathroom Readers Institute have had a soft spot in their hearts for all things

robotic. From the promise of artificial intelligence making the world a better place to the threat of an android apocalypse, we never get tired of reading about robots. They perform surgery, traverse the surface of Mars, and even cook a perfect steak . . . until they malfunction and chase after their human creators. Uncle Johns Robotica Bathroom Reader stimulates humor sensors with hundreds of incredible stories about robots from the past, the present, and the future. Readers should prepare to be assimilated as they learn about robotic suits controlled by monkeys, the robot that can rebuild itself, the worlds first robot, pop-culture robots (such as the mecha-Michael Jackson with laser-shooting eyes), robotic roaches that herd real cockroaches, microscopic nanobots that heal you before you know youre sick, garbage-eating robots, and the actual chances of a Terminator-style robot war.
