That may be predominantly true, so here's a fantastic flashback for your fuzz-toned, drug-aded mind during the onset of spacy senile dementia for all you boomers. And for those not-yet-conceived during the heyday of hippies, spies, spaghetti westerns, good vibrations, remarkable psychedelics, go-go boots, love-ins, the watusi, lovebeads and paisley hip-hugger elephant bellbottoms, rejoice - this book will get you closer to that era than a fistful of Austin Powers flicks and a bongful of kush. Mindblowing, shagadelic, and psychotically trippy, the sexy-psych-cinema of yesteryear is resurrected for re-examination that's a s**tload of fun for everybody who enjoys far-out films, both good and bad, and is reflected upon

not academically nor condescendingly, but affectionately and with proper irreverence. 'Turn on, tune in and drop out' of sight with this book for a freaky foray into the fab facts of your fave 60's cult flick and groovy chicks. Dig it. 0 of 0 people found the following review helpful. Four Stars By HavokTim Interesting book on the more wilder weirder movies out there in the video/dvd/laser disc world.

Cold wars. Hot babes. Cool spies. Warm flesh. Good vibes. Resist authority. Remain nonchalant. "VideoHounds Groovy Movies" is an enlightening, entertaining, eye-opening excursion to more than 200 of the most intriguing and extreme works in cinematic history. Films so weird, so wacky, so cool, they're guaranteed to make jaws drop even today. More than very complicated espionage with arresting cleavage was in the air. Much more. It was a renaissance era for art in general, and these celluloid time capsules from the Age of Aquarius are mind-blowing in their diversity. To this labor of love, Irv Slifkin brings his years of movie reviewing expertise as co-editor of the massive "Movies Unlimited Video Catalog." With 125 extremely cool photos, "Groovy Movies" is organized in 20 arresting chapters, from Criminal Elements to England Swings to Don't Bogart That Trip to Bond and Beyond. Oh ya, and Do They Make You Horny, Baby? Foreword contributor Roger Corman surveys his classic films from the era, including his first-hand research for "The Trip."
