I said I would try to order it on the web and I was pleasantly surprised that carried it, so I placed the order. I have ordered other sheet music and music books from and they have all been standard sized, so I did not check the dimensions. When this arrived, packed in a good sized box, I was shocked that it was tiny, about 5 x 8, the size of a program one receives at a Broadway show. It includes numerous lines of music on each page that only someone with the vision and focus of superman would be able to read and play without massive confusion and eye strain. Although I was doubtful, I took it to my teacher anyway thinking we might be able to enlarge it on a copier. She burst out laughing and said something like it is a "conductor's copy". I guess they all have excellent vision! Did I mention it includes text in both German and English? So much packed into such a little space, just not useful for our purposes at all. Anyway, the beauty of this entire situation is that it was shipped via prime so I can return it free, no harm no foul...and it could have easily been what I needed. Although this did not meet my needs, shopping on continues to amaze me in the most positive ways.

(Schott). Violin, strings, and basso continuo.
