structure, story lines. building conflict, writing climax, continuing action, and character development within the 4-act and 5-act structure. I refer to it regularly. Highly recommended for those serious about pursuing a career as a television writer. 0 of 0 people found the following review helpful. Easy to read By gwlupo Nearly anything you could want to know about writing TV drama is in this book, especially the facts of how the industry works. Easy to read, fast paced, extremely interesting. Exciting interviews and comments from the current leading writers in TV are included throughout. I highly recommend this book. 0 of 0 people found the following review helpful. Best book on writing for television By Renaissance man This is the only book you'll ever need if you want to learn about writing for television. The second best book which I recommend in addition to this one is Writing the Pilot. The content, however, is best absorbed by seasoned writers. If you have never written a screenplay before you need to learn how to do that before thinking about reading this book. I recommend you read Story, Screenplay, Making a Good Script Great, Writing for Emotional Impact and Save the Cat before venturing into TV land.
