Keep your chin up and your nose to the grindstone.By Jay CusterA great book for learning more about the movie industry, and how being willing to try anything and keep a positive attitude. It also satisfied my curiosity about what ever happened to Vinnie after college, we had some fun times in school. I can just visualize Vince being on set and making the dull times more fun, while getting the needed stuff done.

This book made me reexamine many movies and TV shows to see if I could tell where Vince had a part in making that show. 1 of 1 people found the following review helpful. Great read By Big Daddy I HIGHLY recommend Vince's book. I ordered The Art... because 1) easy read, 2) My son just finished English/Cinema at a Big 10 school, 3) this guy's from the midwest. Great thoughts for any profession on getting ahead--BE WILLING to work hard, and treat people well. Which I thought everyone knew, sadly if your under 40 this wasn't taught. If you've got a kid coming out of college and wants to get into film--BUY THIS FOR THEM. 0 of 0 people found the following review helpful. Zen and the Art of creating a career in film By Kevin Mulvey I've known Vince since 1991, his wit and insight into creating a career in film is spot on. So if you think you may want to get into the film biz, you don't need a degree from the local film academy, read thru Vince's book and it just might get you onto the next film set in your town. This guide on "how to get into the movies and what to do when you get there" contains valuable insider information and tidbits of insight for people seeking a career in movies and/or television production, while also offering thoughts for those that yearn to learn about how to better approach any type of job, especially as a freelancer. Plus, it's a fun read for anyone wanting to know more about the inner workings of Hollywood.
